Obese, Ages 20+*	8,000	26%	25%

Key Information

All District Office estimates are based on two years of data, except that for adverse childhood experiences which are based on 2011 data only. All others are 2013-2014, 2012 & 2014, or 2011 & 2013.

*Percent is age adjusted to U.S. 2000 population.

**Estimated counts are rounded to the nearest thousand Vermonters and not age-adjusted. For measures where the percent is calculated using two years of data, the estimated count is divided by two to provide an average number of individuals with the behavior or condition.

☐ Indicates statistically different from Vermont.

^DDefinitions:

- Poor physical health: 14 or more poor physical health days in last month.
- Poor mental health: 14 or more poor mental health days in last month.
- Disabled: activity limitations due to physical, emotional or mental problems OR any health problem that requires use of special equipment.
- Prescription drug misuse: used a prescription drug without your own prescription.
- Physical activity recommendations: 150 minutes of moderate activity or 75 minutes of vigorous activity per week.
